# Greeter

When another adult walks into the room, it is your job to welcome that person and explain what the class is doing.

- Tell them your name and say they are welcome to join our class.
- Explain what the class is learning .
- Tell them what you are working on and why.
- Ask if they would like you to answer any questions.

**SMILE!**

- Explain number related key words and definitions.

# Questioner

It's your job to ask questions about learning that other students are too shy/embarrassed to ask!

- What the learning objective really mean?.
- How long you have to do a task?
- What strategies you can use?
- Can we have an example?

You have to make your questions effective: what do the class really need to know?

# Lead Learner

Well done! You're succeeding in this lesson and have demonstrated the skills you have learned. Now it's time for you to help other students.

- Don't **TELL** them the answers, just help them work it out for themselves.
- Give them some feedback: when you're learning, it's nice to know you are on the right track.
- Share your strategies and explain what worked well for you.

# Monitor

Your job is to watch people while they are learning and see how they are approaching the task. You need to keep a record of your observations as you might be asked to feed back to the group at the end of the activity, or even to say who deserves rewards.

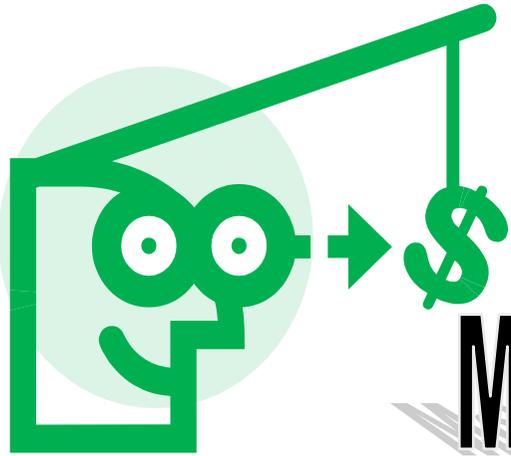

See how many behaviour for learning or poor learning approaches you can observe in a short time!

# Motivator

Your job is to keep students working and on task.

If students are finding the work hard, encourage them to keep going.

**Don't give up !**

Liaise with the other roles to help support other students.
